

R & P Heating & Cooling Presents: Guardian Air HVAC Phi Cell

What is the health of your family worth to you?

Your home is full of odors, air pollutants, VOCs (chemical odors), smoke, mold, bacteria and viruses. Now, there is a simple solution: Guardian Air HVAC Phi Cell.

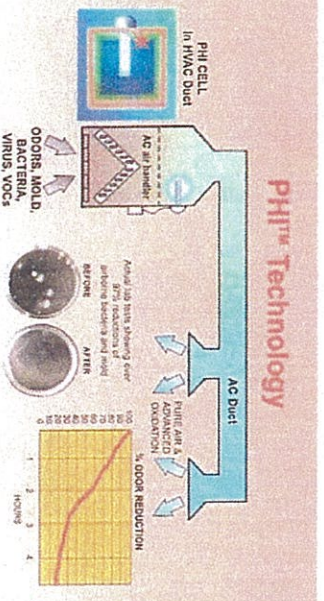

The Phi Cell is a combination of UV light enhanced by a hydrated quad-metallic compound target that develops as advanced oxidation reaction. This Advanced Oxidation process consists of friendly oxidizers: hydrogen peroxides, ozonide ions, super oxide ions, UV light rays, and hydroxide ions. By friendly oxidizers we mean oxidizers that retrogress back to oxygen and hydrogen after the oxidation of the pollutant. With this system, micro-organisms can be reduced by over 97%.

The Guardian Air HVAC Phi Cell is low cost and effective on suppressing mold growth on the coil. It reduces typical viruses and bacteria such as: SARS (99% reduction), Norwalk (99% reduction), and MRSA (Staph, 99% reduction).

How is it installed?

The Guardian Air HVAC Phi Cell is easily installed into an air conditioning and heating systems air ducts where most problems start.

How does it work?

The Guardian Air HVAC Phi cell contains aggressive advanced oxidizers that travel throughout the room attacking pollutants. These oxidizers give your space a continuous supply of fresh, clean, odor-free air without adding perfumes or poison to your indoor environment.

The Phi Cell Advantage:

The Guardain Air HVAC Phi Cell will protect the air quality in your home by using the germic UV Phi Technology light to destroy odors, air pollutants, and all biological contaminate causing disease and illness, sickness causing germs and bacteria.

Other Advantages:

- Over 80% of VOC reduction
- 97% airborne bacterial reduction
- 99% reductions of E.coli, Listeria, & Strep
- 85% odor reduction
- 100% reduction of Bird Flu
- 97% airborne mold reduction
- 99% food surface microbial reduction
- Major US city school reports 20% reduction in absenteeism
- 25,000 Hour Cell Life
